PERSONAL PROFILE

II am currently a Junior Front End Developer at Twilo Creative, where we design, build and maintain, bespoke, custom Wordpress sites. My day to day activities include, site maintenance, development of new client builds and maintaining our in-house css and theme framework.

I also have a hand in the development of our Web Applications that comprise of a Vue.js frontend and Laravel Backend. Although I don't have much involvement with the backend, I am currently completing the Laravel path on Laracasts to up-skill my knowledge of an applications infrastructure and lifecycle.

That's enough about work... In my spare time I love to learn about new technologies being introduced to the development space, including React, Express, Firebase and so on. As you can probably guess I LOVE to code!

CURRENT ROLE

Junior Front-End Developer: Twilo Creative
